DUTCH EMISSIONS AUTHORITY | NEA

Request for information — CBAM declaration 2026

Reference NEA/CBAM/27/1048 | dated 16 October 2027 | addressed to North Sea Metals B.V.

The competent authority is reviewing certain discrepancies between the data available to it and information contained in the authorised CBAM declarant's first annual declaration. The authority requests supporting records to enable the examination to proceed. This letter does not state a final number of additional certificates or impose a monetary penalty.

Information requested

Requested material	Description
Transaction support	Customs declarations, procedure references, release information and any relevant bills of discharge for goods under customs procedures during the 2026 calendar year.
Emissions support	Operator data, verification documentation and calculation sheets showing how the declared embedded emissions and relevant adjustments were derived.
Internal controls	Version history, source-data mapping and records relevant to the date on which the declaration was made.
Observations	A written explanation of any reconciliation differences and the supporting documents relied upon.

Please provide the information by 6 November 2027 or contact this office before that date to explain any difficulties in producing particular records. This request is made without prejudice to any later determination or other measure available under Union or national law.

Attached comparison notice — Commission/system data feed

The comparison contains summary fields from transaction information communicated by customs authorities. It identifies entries associated with NSM's customs identifiers that do not match the importer's annual filing population. The feed distinguishes a customs procedure opening, a discharge event and a release declaration by event type, without expressing a final legal conclusion as to which emissions belong to the annual CBAM declaration.

Feed reference	Procedure group	Recorded event window	Reported quantity
NL-IP-061	Inward processing	April–December 2026	400 t input goods
NL-IP-088	Inward processing	July–December 2026	300 t input goods
NL-IP-112	Inward processing	October 2026–January 2027	500 t input goods
