FERROORION ELEKTRIK CELIK A.S.

2026 product benchmark annex

Record FEO-SFA-26/104 | signed 7 July 2027 | calendar-year source extract

Installation	TR-FEO-014 | Aliaga electric-arc furnace
Goods	7207 12 10 | carbon steel semi-finished slab
Period	1 January to 31 December 2026
Declared route	Scrap/EAF — carbon steel

Source parameter schedule

Parameter	Reported value
Production-process benchmark, Column A	0.065000 tCO2e/t; route E
Applicable 2026 CBAM factor	0.975
CBAM-listed precursor mass in production process	None — scrap feed in this route
Specific embedded free allocation (2026)	0.063375000 tCO2e/t

Assurance and distribution record

Aster Verification AG, CBAM-FE-204; statement FEO-SFA-V/26/104, 11 July 2027. Reasonable assurance, 2026 product and calculation scope.

The installation-specific product parameter is recorded for the described 2026 steel slab. The source-level embedded-direct-emissions account is referenced as VC-FE-26-101.

Archive note — seller exchange receipt

The source-specific statement and verification reference were indexed in the Anatolia Trading customer exchange before 25 September 2027 under the installation code and the 2026 reporting period. Related supporting records are held by the respective source operators and identified by the installation and reporting-year references.

BOSPHORUS PRIMARY STEEL A.S.

2026 product benchmark and input annex

Record BOS-SFA-26/220 | signed 18 July 2027 | calendar-year source extract

Installation	TR-BOS-021 | Izmit integrated BF/BOF steelmaking
Goods	7207 12 10 | carbon steel semi-finished slab
Period	1 January to 31 December 2026
Declared route	BF/BOF — carbon steel

Source parameter schedule

Parameter	Reported value
Slab process benchmark, Column A	0.188000 tCO2e/t; route C
Pig iron input for slab product category	1.080000 t/t; CN 7201 10 11
Pig iron producer specific free allocation	1.061775 tCO2e/t (2026 verified source)
Applicable 2026 CBAM factor	0.975, process component
Specific embedded free allocation (2026)	1.330017000 tCO2e/t

Assurance and distribution record

CarbonSure Europe GmbH, CBAM-CS-118; statement BOS-SFA-V/26/220, 25 July 2027. Reasonable assurance, 2026 slab and verified upstream input scope.

The pig-iron input and its source measure are recorded in the 2026 process reconciliation. The slab direct-emissions statement is separately indexed as VC-BF-26-220.

Archive note — seller exchange receipt

The source-specific statement and verification reference were indexed in the Anatolia Trading customer exchange before 25 September 2027 under the installation code and the 2026 reporting period. Related supporting records are held by the respective source operators and identified by the installation and reporting-year references.

SOMA FLAT PRODUCTS SANAYI A.S.

2026 hot-rolled feed annual source schedule

Record SMR-SFA-26/066 | signed 19 August 2027 | calendar-year source extract

Installation	TR-SMR-066	Soma, Turkiye
Goods	7208 39 00	hot-rolled carbon steel feed
Period	1 January to 31 December 2026
Declared route	DRI/EAF-linked hot rolling

Source parameter schedule

Parameter	Reported value
Hot-rolling process benchmark, Column A	0.044000 tCO2e/t
DRI/EAF slab precursor mass	1.040000 t per tonne hot-rolled output
Upstream slab verified 2026 SEFA	0.463125000 tCO2e/t; ref DR-SFA-26/067
Applicable 2026 CBAM factor	0.975, process component
Specific embedded free allocation (2026)	0.524550000 tCO2e/t

Assurance and distribution record

Aster Verification AG, CBAM-FE-204; verified 24 August 2027. Scope: 2026 CN 7208 39 00 SEFA, process benchmark, precursor quantity and producer-attested slab SEFA.

The process input measure and upstream source parameters are recorded in the cited annual verification calculation and facility records.

Archive note — seller exchange receipt

The source-specific statement and verification reference were indexed in the Anatolia Trading customer exchange before 25 September 2027 under the installation code and the 2026 reporting period. Related supporting records are held by the respective source operators and identified by the installation and reporting-year references.

KASTEL HOT STRIP SANAYI A.S.

2026 hot-rolled feed annual source schedule

Record KST-SFA-26/073 | signed 22 August 2027 | calendar-year source extract

Installation	TR-KST-073 | Kocaeli, Turkiye
Goods	7208 39 00 | hot-rolled carbon steel feed
Period	1 January to 31 December 2026
Declared route	BF/BOF-linked hot rolling

Source parameter schedule

Parameter	Reported value
Hot-rolling process benchmark, Column A	0.044000 tCO2e/t
BF/BOF slab precursor mass	1.040000 t per tonne hot-rolled output
Upstream slab verified 2026 SEFA	1.329900000 tCO2e/t; ref KS-SFA-26/071
Applicable 2026 CBAM factor	0.975, process component
Specific embedded free allocation (2026)	1.425996000 tCO2e/t

Assurance and distribution record

CarbonSure Europe GmbH, CBAM-CS-118; verified 28 August 2027. Scope: 2026 CN 7208 39 00 SEFA, process benchmark, precursor mass and underlying BF/BOF slab source verification.

This document records the source-specific 2026 product parameter. The verification reference identifies the installation and relevant annual process records.

Archive note — seller exchange receipt

The source-specific statement and verification reference were indexed in the Anatolia Trading customer exchange before 25 September 2027 under the installation code and the 2026 reporting period. Related supporting records are held by the respective source operators and identified by the installation and reporting-year references.
